The first part of the report is devoted to a general description of the project and its objectives. It is followed by a detailed account of the work done during the period covered by the report. The results of the work are then presented, and a conclusion is drawn from the findings.

The work was carried out in accordance with the programme of work approved by the Committee at its meeting on 15th June 1961. The main objectives of the work were to determine the effect of the treatment on the growth and yield of the crop, and to determine the effect of the treatment on the nutrient content of the crop.

The results of the work are presented in the following tables. Table 1 shows the effect of the treatment on the growth and yield of the crop. Table 2 shows the effect of the treatment on the nutrient content of the crop.

It is concluded that the treatment had a significant effect on the growth and yield of the crop, and on the nutrient content of the crop. The treatment increased the growth and yield of the crop, and increased the nutrient content of the crop.
